## PROFESSIONAL SUMMARY

Computer Science and Engineering student with a strong foundation in data analysis and full-stack development. Skilled in Python, SQL, Excel, Power BI, Tableau, HTML, CSS and Angular, with hands-on experience building full-stack web applications and turning raw data into clear, actionable insights. Backed by certifications in Data Analytics, Cloud Computing, Artificial Intelligence and Full Stack Development. Adaptable, committed to continuous learning, and eager to contribute to data-driven projects with dedication.

---

## TECHNICAL SKILLS

- **Front-End:** HTML5, CSS3, Angular
- **Programming:** Python, SQL
- **Data Analysis & BI:** Power BI, Tableau, Microsoft Excel, Google Sheets
- **Python Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** MySQL, Supabase
- **Data Skills:** Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Data Visualization, Dashboard Development, Statistical Analysis
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

---

## EDUCATION

### B.E. Computer Science and Engineering (2023 – 2027)

St. Joseph College of Engineering, Chennai • CGPA: 8.0 / 10

### Higher Secondary

CSI St. Ebba's Matriculation Higher Secondary School, Chennai

---

## CERTIFICATIONS

- Data Analyst — QSpider Institute (selected via Compass interview; Campus Recruitment Training Program)
- Data Analytics — Novi Teck
- Full Stack Development — Blend Vidya
- Cloud Computing — Corizo, Wipro Certified
- Artificial Intelligence — Corizo, Wipro Certified

---

## PROJECTS

### Retail Transaction & Demographic Analysis using Python

- Analyzed 2.1M+ retail transaction records using Python and Pandas to uncover household purchasing patterns across product departments.
- Optimized memory usage by ~25% (98.3MB → 73.7MB) by downcasting transaction columns to smaller integer types and converting demographic fields to categorical dtypes.
- Merged transaction, household demographic, and product datasets using Pandas to build a unified household- and department-level sales view.
- Used Pandas groupby and pivot\_table to aggregate sales by household and analyze spending across age groups and 38 product departments.
- Exported final aggregated results to Excel for reporting.

*Tech:* Python, Pandas, Excel

### Whistle – Event and Hall Booking App

- Engineered a full-stack event booking platform for discovering and reserving venues and services in real time.
- Designed a responsive UI that simplifies vendor selection, booking management and event planning workflows.
- Integrated secure payments (Razorpay) and a scalable backend for real-time availability and data management.

*Tech: HTML, CSS, Python, Supabase, MySQL, Razorpay API, Leaflet (maps)*

### Webinar – Online Course Platform

- Developed a webinar and online course platform where users explore, select and enroll in courses, and admins manage course content.
- Built a responsive interface and a scalable backend using Spring Boot and REST APIs for efficient course and user data handling.

*Tech: HTML, CSS, Python, Supabase, MySQL, Postman API*

## ACHIEVEMENTS

---

- 3rd Place among 150+ projects at the Inter-College Project Expo (2025) for innovative project development and execution.
- 3rd Place among 150+ projects at the Inter-College Project Expo (2026) for innovative project development and successful execution.
- Selected through the Compass interview for QSpider Institute's Campus Recruitment Training Program; chose the Data Analyst domain and completed certification, building skills in Python, SQL, Excel, Power BI, Tableau and data visualization.
